KL4GV1a 07.04.2012 (8) Cool, I like it. CSikee 01.04.2012 (10) Starts recording all keyboard buttons right away 02.01.2013 (8) Problem using with Realtek ALC888 02.01.2013 (5) Version 2.1.5 available for users of Windows XP and above as a hotfix. Placed a review before the update. The new version of the application failed to properly record my attempts to enter a password into a virtual machine, so I had to go back to the previous version. LGQOoA 01.04.2012 (8) Well done, to be honest I didn't think a button logger would be that useful. drjm 27.09.2014 (4) Your product is VERY useful. I have a new laptop and am using it for typing tutorials and books. I use this software with every computer I use. A keylogger would work as well, but that's more of a tool for detecting unauthorized uses of your computer. KL4GV1a 07.04.2012 (8) I like it. It's not worth the price, I have the older version installed and use it all the time. I would say it's \$40 instead of \$30. Why is it \$30? It's not a big deal, but I don't see why.
